

Durable, Lightweight and Ultra-Mobile

Mobility Matters™

The **eo TufTab™ v7112XT** is the ultra-mobile computing solution built for hard working professionals who are constantly on the road or in non-traditional working environments.

Powered by an energy efficient VIA C7®-M ULV processor and running your choice of Windows Vista™ Business, Window® XP Tablet Edition or openSUSE Linux™, the rugged yet lightweight **eo TufTab™ v7112XT**, equipped with a biometric fingerprint reader, provides the perfect combination of mobile performance, security and durability.

Available in either black or white, the reinforced, tough plastic and rubberized casing provides a sturdy and balanced feel for engaging in fieldwork, warehousing, mobile point of sale, data collection and other professions that demand a tougher-than-usual working environment.

Designed to withstand more extreme environmental conditions than a standard PC, the IP53 rated **eo TufTab™ v7112XT** includes protection from rain, dust, humidity, extreme temperatures and vibration. Where ever your work takes you, a rugged **eo TufTab™** is the best mobile solution for your demanding ultra-mobile computing needs.
